

Pacific Beach EcoDistrict Performance Areas

PBPG Approved Phase 1 & 2 Map

PB Pathways

KEY

- Phase 1 PB Pathways
- Phase 2 PB Pathways
- Bicycle Network

WHAT ARE THE PB PATHWAYS?

Streets with low traffic volume and speed where **bicycles, pedestrians, and neighbors are given priority.**

They accomplish this by:

- **Reducing auto speeds and discourage “cut-through” traffic** through traffic calming measures
- **Helping people cross** our busier streets by improving crossings and pedestrian connections
- **Guiding people** and helping get them where they are going – pavement markings and signage let you know where the Pathway goes and what’s nearby, like parks and business districts.
- **Increasing safety** - more people out on the street bicycling and walking leads to safer streets!

Distance and Directional Signage Pavement Wayfinding Markers

PB Pathways Map with Planned Repaving

Proposal 1

In conjunction with the planned repaving on Jewell, Lamont, Olney and Diamond in Pacific Beach

- a. Placement of Sharrows alternating with PB Pathway Pavement Markers (used in PB Pathways Phase I implementation).
- b. Placement of PB Pathway wayfinding street signage at the same standard implemented for PB Pathways Phase I
- c. A few blocks are not scheduled for resurfacing thereby creating gaps. Please include these blocks to create a contiguous project.

Proposal 2

In conjunction with the planned repaving on Balboa and Grand in Pacific Beach

a. Paint intersections with NACTO guidelines for treatments through the intersections as an interim solution until a protected intersection can be designed and funded.

b. Wayfinding signage for guidance and support of active commuters.

THANK YOU
