

1040 Garnet Avenue Space

Curator Tiffany Allen

Artists Jose Ruigomez and Grant Jensen have been curated to showcase their contemporary photography work. They each bring a fresh and exciting perspective to photography with their considerate use of negative and positive space, composition, lighting and subject matter.

Jose Ruigomez is a multi-media artist originally from Mexico City who has been photographing streetscapes and people from all over the world. His style is refreshing, playful and gives the viewer a feeling of deja vu, as if they had seen or experienced his perspective before. His relation to space and use of texture reminds us to stop and appreciate the tiny moments happening all around us that can easily be overlooked as mundane.

Grant Jensen is a Denver based architect who calls himself an "accidental artist" as his work is all done from the use of his iphone, although you would swear otherwise. Grant's use of monochromatic schemes, minimal compositions and light with shadow draws the viewer into his abstract scapes and creates a sense of pause and wonder, a curiosity for what the subject matter is.

Tiffany Allen is a San Diego based curator, with a background in architecture and photography. Her love for contemporary art and form brings a modern feel to her shows.

Jason Reditt is a San Diego based DJ and designer and will be curating the music for our gallery.
